**WHY NOHA NEEDS YOUR HELP:**

Children in Noha's community face many challenges. This urban community is very poor, with a large number of people living in slums. Most do not have access to water. A lack of sanitation and insufficient drainage in the slums creates many health problems. Diseases such as malaria, tuberculosis and diarrhoea are very common. Health centres are inadequately staffed and have few medicines. Many children have no formal education and, as a consequence, are often forced to work as child labourers to support their families.

**HOW WE WILL HELP NOHA:**

Our sponsorship will help to provide:

- Clean, safe water
- Better sanitation by building sewage systems
- Health check-ups and immunisation for children
- Healthcare facilities and medicine
- Advocacy around child labour
- New school buildings and supplies for children
